MATERIAL SAFETY INFORMATION

Uniphos Envirotronic and Factory Direct Safety & Environmental (FDSE) do not provide Material Safety Data Sheets for detector tubes sold in the USA because they are not required. Detector tubes fall under the category of “article” as defined in 29 CFR 1910.1200(c) and therefore are exempt from the Hazard Communication Standard. The bulk of the materials inside each tube are inert and non-hazardous. The active ingredients (minor components) for each type of tube are given in the corresponding tube sheet included in each box of tubes. FDSE can provide more detailed information on request for those who accumulate used tubes and are concerned about proper disposal.
